DETAILED ACTION

1. In response to the communication dated 12/31/2007, claims 11-15 are active in this application as the result of the cancellation of claims 1-10 and 16-20 and in the condition for allowance.

2. Examiner has made a provisional, judicially created, obvious-type double patenting rejection over the copending application number 09/821928 in previous office actions. The filing of a terminal disclaimer had been acknowledged and approved.

Examiner's Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. John Rooney, Reg. No. 28898 on January 18, 2008.

The application has been amended as follows:

11. (Currently amended) A method of dynamically building a service which modifies data within a data base from a user terminal coupled via a publicly accessible digital data network to a remote data base management system which responds to said service by executing an ordered sequence of command language script having a service building process comprising:

a. building a customized user interface from a plurality of components stored within said data base;

b. identifying a ~~discreet~~ discrete and independent step ~~using said customized user interface~~ corresponding to a first portion of said ordered sequence of command language script using said customized user interface;

c. identifying a subsequent ~~discreet~~ discrete and independent step ~~ordered subsequently to said discreet and independent step~~ corresponding to a second portion of said ordered sequence of command language script and inserting said subsequent discrete and independent step subsequently to said discrete and independent step;

d. repeating steps a, b, and c until said service is completely ~~defined~~ built; and

e. storing said completed service as a ~~plurality~~ an ordered sequence of said ~~discreet~~ discrete and independent steps within said data base for future individual use, each step of said ordered sequence of said discrete and independent steps is tabular and edited independently.

12. (Currently amended) A method according to claim 11 further comprising editing said ~~discreet~~ discrete and independent step without modification to said subsequent ~~discreet~~ discrete and independent step.

Allowable subject matter

4. The following is an examiner's statement of reason for allowance:

None of the references of record Glaser (US Patent No. 6,058,264) and Bae (US Patent No. 6,295,531) teaches or suggests the claimed (Claim 11) invention having, in addition to the other limitations in the claims, the limitation of identifying a discrete and independent step corresponding to a first portion of said ordered sequence of command language script using said customized user interface; identifying a subsequent discrete and independent step corresponding to a second portion of said ordered sequence of command language script and inserting said subsequent discrete and independent step subsequently to said discrete and independent step; and storing said service as an ordered sequence of said discrete and independent steps within said data base for future individual use, each step of said ordered sequence of said discrete and independent steps is tabular and edited independently.

Dependent claims 11-15 are allowable because they depend from base claim.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Conclusion

6. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to become abandoned (see M.P.E.P 710.02(b)).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gauthier U.S Patent No. 6,948,134 discloses integrated method for creating a refreshable web query.

Reddy U.S Patent No. 6,948,134 discloses common user interface development toolkit for a system administration program.

Robotham U.S Patent No. 6,704,024 discloses visual content browsing using rasterized representation.

Weissman U.S Patent No. 6,212,524 discloses method and apparatus for creating and populating a datamart.

Angus U.S Patent No. 7,003,504 discloses data processing system.

Prompt U.S Patent No. 6,985,905 discloses system and method for providing access to databases via directories and other hierarchical structures and interfaces.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marilyn P Nguyen whose telephone number is 571-272-4026. The examiner can normally be reached on M-F: 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on 571-272-1834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
